

Supplement Materials for
“The Volume and Structure of the Transatlantic Slave Trade: A Reassessment.” By David Eltis.

Table III: Slaves Carried into the Atlantic Trade by French Ships, 1630-1810 (in thousands).

Period	Departures	Arrivals
1669-1700	40.0*	32
1701-1793	1,035.9	908.1
Allowance for missing voyages, 1701-1793	65.2	47.8
1794-1810	13.9	13.6
1811-1833	301.3	262.2
1669-1833	1,456.3	1,263.7

Estimate based on voyage mortality of 0.2. Voyage mortality on early French voyages was not much different from that on English ships. A sample of 9 French voyages, before 1705 yielded a mean mortality of 0.193 (SD = .173). Source: see text.
