

Supplement Materials for
“The Volume and Structure of the Transatlantic Slave Trade: A Reassessment.” By David Eltis.

Table IV: Slaves Carried Across the Atlantic by Dutch Ships, 1630-1810 (in thousands).

Location	Departures	Arrivals
Americas, other than Brazil, 1606-50	17.0	13.6
Dutch Brazil, 1630-1650*	31.0**	
Americas, 1651-74	61.2***	53.3
Americas, 1675-1810	418.5	358.8
Americas, 1606-1810	527.7	452

* Includes one slave vessel that arrived in 1651.

** Calculated from van den Boogart and Emmer, cited below, with an allowance for voyage mortality for the years 1630, 1636, 1646- 1651, during which data on arrivals only are available. Voyage mortality of 17.87 percent of those embarked is calculated from the same source. Mortality includes some deaths that occurred after slaves disembarked and prior to sale in the Americas.

*** Voyage mortality used to estimate arrivals calculated from idem. Sources: Row 1, see text; Row 2, Ernst van den Boogart and Pieter Emmer, “The Dutch Participation in the Atlantic Slave Trade, 1596-1650,” in Henry A. Gemery and Jan S. Hogendorn (eds.), *The Uncommon Market: Essays in the Economic History of the Atlantic Slave Trade* (New York, 1979), 353-75; Row 3, Postma, *Dutch in the Atlantic Slave Trade*, 35, with an allowance for voyage mortality (see note); Row 4, calculated from the *Trans-Atlantic Slave Trade Database*.
